

Hard to believe that it is already April!
 This month we are going to continue to learn about spring and start our unit on insects.
 This month we will also learn about fairy tales and retelling or acting out the stories.
 Our whole-class goals for literacy are to recall, sequence and retell a story.
 In Math we are exploring how we find math everywhere. We are practicing adding and subtracting small groups of numbers. We are playing board and card games to practice all the skills we learned this year.

2021
